

New Jersey Clean Energy Seminar

for Wyckoff Residents

Thursday, January 19, 2012

7:30 p.m.

Wyckoff Town Hall, 340 Franklin Avenue, 2nd Floor, Wyckoff NJ

Home Energy Efficiency is a hot topic these days. Energy costs are higher than ever, and the associated pollution and carbon emissions are damaging the environment. How can homeowners stretch the dollars they spend on energy? **New Jersey's Office of Clean Energy has rebate and incentive programs to help NJ residents improve their efficiency and reduce their energy costs.**

This seminar is being offered to spread awareness of these programs to local residents, with information on how they can get up to \$5000 along with 0% interest loans to help offset the costs of these energy efficiency improvements.

The **featured speaker is "Eco" Ed Schwartz, Chairperson of Ridgewood's Environmental Advisory Committee**, and co-founder of Green Living Solutions (Century Award winner within the Clean Energy Program). He will be speaking about energy use, energy savings approaches and explaining how to take advantage of the significant subsidies that are currently available to New Jersey homeowners.

FREE ADMISSION

Event sponsored by the Wyckoff Environmental Commission
